MARIS OMEGA-3: Neutral taste EPA/DHA for food

IOI's range of MARIS OMEGA-3 ingredients helps making great products healthier, offering all the well-documented benefits of EPA and DHA for the cardiovascular and the nervous system. MARIS OMEGA-3 is manufactured "fresh as sushi", making use of innovative production technology to reach lowest oxidation levels. 100 % neutral in taste and smell, MARIS OMEGA-3 provides superior sensory properties and stability for food applications.

Omega-3 can be difficult to work with in some food categories. Knowing which kind of ingredient to choose and how and where to add it within the production process, in many cases is the key to a successful omega-3 product development. IOI is guiding customers through omega-3 food projects. With our technical support on formulation and process, time and resources for the product development can be efficiently managed. Recent projects include milk, yoghurt, beverages, pasta, muesli bars, bread, ready meals, smoothies, supplement, infant formula and others.

IOI continuously observes market developments and cooperates with research facilities and scientists, industry organizations and regulatory advisors. This gives customers access to up-to-date science and marketing information as well as to the development of dietary recommendations and health claims.

MARIS OMEGA-3 ingredients:

MARIS OMEGA-3 ingredients are available as natural oil, water soluble powder and tailor-made preparations for various food and supplement applications.

MARIS OIL ED 0222
EPA \geq 3 %, DHA \geq 22 %
